SMASH THE WORD SEARCH

Break The Limits

Scan the notebook cover closely—every word hides in plain sight through form, motion, or meaning. This isn't speed play: it's precision thinking. Let your eyes rally before your pencil strikes.

1. I am the dynamic sport depicted on your cover, played with the stringed oval frame that demands agility and a bouncing motion across the court. What sport am I?

2. The equipment seen on your cover used to strike the ball mid-rally.

3. The small, round object frozen in motion on the strings as spotted on the back cover.

```

K E S P E L K E L I M I T S
```

"Wherever you see "cover", it means both the front and back.

4. The action that launches the game and tests reaction time.

5. The forceful shot hinted by the bold phrase on the cover.

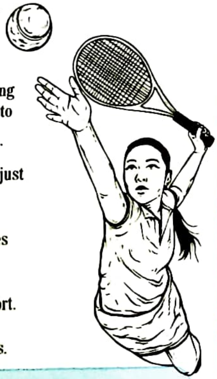
6. The phrase on your cover that conveys—the barrier standing between you and greatness, the invisible wall you were born to defy.

7. The athlete's forward-leaning pose on your cover, captured just before impact.

8. The invisible energy and movement captured in blurred lines and flowing paint that proves the player isn't standing still.

9. The competitive exchange between the two sides in this sport.

10. The concept of pushing beyond physical or mental barriers.



Why Tennis Is a Thinking Sport

Professional tennis players make up to 4–8 decisions per second during rallies—choosing spin, angle, and placement while reacting to speeds over 200 km/h.

Answers: 1. Tennis, 2. Tennis Racket, 3. Ball, 4. Serve, 5. Smash, 6. Limits, 7. Stance, 8. Motion, 9. Rally, 10. Endurance
